

INSTRUCTIONS FOR THE PREPARATION OF MANUSCRIPTS

1. Language: English
2. Maximum Length: 6 pages. Additional pages cost \$60.00 per page with a maximum of 2 pages.
3. Manuscripts should be prepared to fit properly on plain white paper (8 1/2 x 11) using 12 point BOLD size font for title, author, address information and e-mail address **centered** over 2 columns, and 10 point size font for 2-column manuscript format. Dimensions are as follows: top margin: 7/8 inch; bottom margin: 1 inch; left and right margins: 3/4 inch; column separation 1/2 inch for **2-column format required**. DO NOT USE PAGE NUMBER IN THE FINAL MANUSCRIPT.
4. Paper title must not contain all capital or uppercase letters. Only the first letter of each word, which is not an article (a, an, the) or conjunction (in, on, at, of, etc.), can be in upper case.
5. Author name must follow this format (in that order): Given name, middle initial (if any), Family name. Do not capitalize all letters in the family name. Do not include anything else (such as Prof., Dr., Ph.D, SMIEEE, etc.) in an author's name.
6. Manuscripts must be prepared so they can be printed directly onto 8 1/2" by 11" plain white paper. For those familiar with LaTeX, a copy of the LaTeX macro is provided. You may have to edit the preamble to be sure you have an inch for the top and bottom margins.
7. Manuscripts should be single-spaced with double spacing between paragraphs, and 5-space paragraph indentation. Allow an extra half space above a line containing superscripts and below a line containing subscripts. Do **not** include page numbers in final pdf document.
8. The paper should include: (a) Title - 10 words maximum length; (b) author's name, affiliation and present address; (c) abstract - Maximum 200 words for papers; (d) a maximum of six key words; (e) a clearly written introduction to explain the nature of the problem, previous work, purpose and contribution of the paper; and (f) a conclusions section must be included and should indicate clearly the advantages, limitations and possible applications.
9. Illustrations, graphs, and photographs may fit across both columns, if necessary, but keep the text in two-column format. Artwork must be in place on the article (preferably, included in the text file rather than pasted up). If you are using photographs, please have halftones made at a print shop (using an 80- or 100-line screen). If they must be pasted up, use rubber cement to affix the halftones in place. Halftones can be shot from a color or black- and-white photo.
10. References should be quoted in the text with a number in square brackets; for example: [1].
11. Papers: author, title, journal, volume number, issue number and year, inclusive pages; for example: [1] G. E. Moore, "Microprocessor and Integrated Electronic Technology, " Proc. IEEE, vol. 64, pp. 837-841, 1978.
12. Books: author, title journal, volume number, issue number and year, inclusive pages; for example: [2] M. Kayston and W. R. Fried, Avionic Navigation Systems, John Wiley and Sons Inc., New York, 1969.

The FINAL camera-ready manuscripts (with NO page number) along with the Author's Registration Form with Fee, and the ISCA Copyright Forms(s) should be sent electronically using e-mail attachments to: isca@ipass.net. All registration materials **must be received before AUGUST 15, 2013** in order for your manuscript(s) to be published in the proceedings of the conference.

Proceedings will be available at the conference.
